

## Manual Nanolex Premium Glass Cleaner

### **Product Description:**

Nanolex Premium Glass Cleaner is a water based cleaner for glass and glazed ceramics. It contains abrasive components and citric acid which can't produce scratches on hard surfaces. This abrasive cleaner absorbs cutting and silicon oils, removes heavy soiling, and is designed for cleaning glass before an application of Nanolex Premium/Urban Glass Sealant.

**This product can be stored for up to 36 months (in a dry, temperature stable environment)**

### **Consumption:**

appr. 20ml/m<sup>2</sup>

**Processing temperature:** 15-30°C - Avoid direct sunlight and/or high air humidity.

### **SAFETY REFERENCE:**

The usual behavior rules regarding chemical substances are to be followed during the use of all car care products: Make sure that the room you work in is ventilated enough. In case you have eye contact rinse the eyes out for at least 15 minutes, especially under the eyelids. In case a liquid was swallowed make sure you drink a lot of water and avoid to vomit – see a doctor immediatly. Keep out of the reach of children. Keep out of surface water and drains.

### **1. Cleaning with Nanolex Premium Glass Cleaner**

Shake the bottle containing the Nanolex Premium Glass Cleaner well before use.

Pour Nanolex Premium Glass Cleaner onto the surface or onto a wet cloth. Clean the glass surface in circular movements, until the surface is completely clean and free of any cleaner residue.

If the cleaner dries on the surface, moisten the cloth with some water and wipe again.

One can remove Nanolex Premium Glass Cleaner from larger surfaces with wet wipe or rinse with water.

Polish clean surface to a clear dry state free of streaks.

### **2. Surface aspects**

Suitable for glass, also for ceramic tiles, ceramics and metal surfaces.

Do not use Nanolex Premium Glass Cleaner on scratch sensitive surfaces like acrylic glass and plastics.

Do not use the material on acid sensitive materials like natural stone.

Try to avert contact of Nanolex Premium Glass Cleaner with dark plastic and rubber-like surfaces. Remove residue of Nanolex Premium Glass Cleaner with some alcohol.

### **3. Checking for cleaning efficiency of Nanolex Premium Glass Cleaner**

If Nanolex Premium Glass Cleaner is used as a pre-cleaner for Nanolex Premium/Urban Glass Sealant, water must spread into a uniform film right after cleaning and must not collect into drops.

### **4. Important Note**

If Nanolex Premium Glass Cleaner is used as a pre-cleaner for Nanolex Premium/Urban Glass Sealant do not use wipes that contain skin care

agents. Residues of these substances can reduce the adhesion of the later applied sealing.

Disposal: regard your local rules and regulations

**Read carefully:**

The information on this data sheet is based on the current status of technical development as well as our experience with the product. However, given the variety of surfaces and ambient conditions, the information provided on this data sheet shall in no way diminish the responsibility of the user to ensure with due care, that our product is suited for the intended purpose, surface and application conditions. Note in particular, that we accept no liability in cases where we have not explicitly stated application purposes and types of use.
